

PW539-2

Full Height Double Turnstiles

Features:

- » Stable and reliable mechanical locking device, precise movement and turntable combination structure with special technology;
- » With two-way traffic function, the brake lever steering is divided into two-way and one-way;
- » With the function of power-off and opening, in case of emergency, the cross shaft rotation shaft is switched from locked to free passage mode, and pedestrians can pass quickly to meet the requirements of the fire protection passage;
- » After the pedestrian reads the valid card, if the system does not pass within the specified time, the system will automatically cancel the pedestrian's access permission;
- » Install a two-way arrow indicator to indicate the passing status, whether passing or not;
- » There is a DIP switch on the control panel, which can adjust the pass delay time through an algorithm, and can also be adjusted to a memory mode, for example: swiping a valid card five times and passing five people;
- » Anti-reverse device function prevents the rotating unit from rotating in the opposite direction to the original direction.

SPECIFICATIONS:

Technical Data	Unit
Material	SUS304
Size	2400*1550*2300mm
Unlock time	0.2s
Pass rate	30p/m
Pass width	650mm
Input voltage	100V~240V
Driving voltage	24V
Environment	-15~+55°C
Power	30W
Input signal	Dry contact
